Clearion Announces New VP of Operations and New Senior Consultant/Senior Scientist

ATLANTA, GA, May 29, 2018—Clearion, a leading provider of integrated geospatial solutions that simplify complex work management processes for utility, telecom, pipeline, transportation, and non-profit organizations worldwide, today announced that it has created two new positions to support its growing business. On May 1, 2018, Shabi Yehudai began as Clearion’s new vice president of operations, and Madelyn Mateo joined the Sales and Marketing Team in a dual role as senior consultant and senior scientist.

Shabi Yehudai, with a background in Management and Computer Science, spent the past 18 years at Amdocs, a global enterprise software company serving the wireless telecom industry, where he managed a large testing and delivery team. In the newly created role of vice president of operations, Shabi will work side-by-side with Clearion Co-founder Lianne Stewart over the coming months to ensure a smooth transition as he takes over management of the implementation, support and hosting operations. Stewart is moving into a new role as executive vice president, where she will deepen her focus on customer success and other important strategic initiatives. “We are thrilled to have Shabi bring his considerable expertise and experience to Clearion as we enter our next phase of growth,” said Stewart.

Madelyn Mateo comes to Clearion from Consolidated Edison of New York, where she worked in the Environmental Health and Safety Department. Prior to this role, Madelyn was a Clearion customer at Florida Power & Light Company (FPL). She maintains numerous industry certifications in the areas of utility arboriculture and herbicide management, has a Bachelor of Science in Environmental Studies from Florida International University and is currently obtaining her Master of GIS from Penn State University. She also brings a unique experience to Clearion with her understanding of the challenges and opportunities that utilities (and other ROW managers) face as they attempt to integrate sustainability initiatives with their ROW and asset maintenance operations.

Serving the dual role of senior consultant and senior scientist, Mateo will work to manage and expand the relationships with Clearion’s key clients. She will also represent Clearion in its work with organizations, such as the Right-of-Way Stewardship Council and the Pollinator Habitat Initiative, as the company expands its industry involvement in ROW sustainability.

“Co-founders Mano Sadeh, Lianne Stewart, and I are excited to have Shabi and Madelyn join the great group of people at Clearion. They each bring skills and expertise that complement our outstanding team, and they will enable Clearion to broaden our solutions and provide even better service to our growing customer community while expanding our focus on sustainability efforts,” said Co-founder Chris Kelly.
